WestWood's Wecryl 240 waterproofing system offers a rapid-curing, seamless solution for a wide range of waterproofing needs - **without** the complexity or labor of **fabric reinforcement**. Designed for speed, simplicity, and performance, this non-reinforced system delivers dependable protection where time and efficiency are critical.

KEY BENEFITS

PIONEERING FORMULA

Wecryl 240's revolutionary PMMA formulation delivers seamless, durable waterproofing without reinforcing fleece, simplifying application and ensuring lasting protection on a wide range of substrates.

LABOR SAVINGS

Wecryl 240 reduces labor hours, installing up to 60% faster than reinforced systems — saving time, cutting labor costs, and boosting jobsite efficiency without compromising performance.

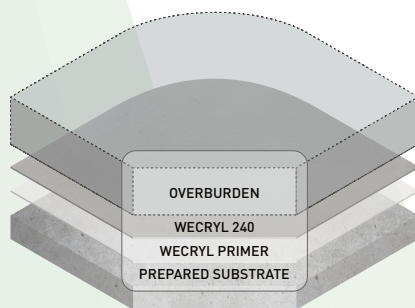

SEAMLESS & MONOLITHIC

Wecryl 240 delivers a truly seamless waterproofing layer, eliminating joints and vulnerable overlaps for durable, long-term protection in even the most detail-intensive applications.

RAPID CURING

Wecryl 240's fast-curing PMMA technology minimizes delays, with surfaces rainproof in just 30 minutes. Minimizing delays and keeping projects on schedule even in challenging conditions.
