

WestWood Fleece

Also known as **ALT Fleece**

- Product No. 3000820** - 41.3" width with printed gridlines
- Product No. 3000229** - 41.3" width
- Product No. 3000XXX** - 27.5" width with printed gridlines
- Product No. 3000228** - 27.5" width
- Product No. 3000XXX** - 20.6" width with printed gridlines
- Product No. 3000222** - 20.6" width
- Product No. 3000XXX** - 13.8" width with printed gridlines
- Product No. 3000211** - 13.8" width
- Product No. 3000204** - 10.5" width
- Product No. 3000192** - 8.0" width
- Product No. 3000186** - 6.0" width
- Product No. 3000180** - 4.0" width

All fleece widths are available in lengths of 164' (50 m).

PRODUCT DESCRIPTION

WestWood Fleece is a non-woven, chopped strand 110-gram mat polyester fabric used in cold fluid-applied reinforced membrane systems to enhance tear strength, puncture resistance, and crack-bridging performance while maintaining membrane uniformity.

ADDITIONAL INFORMATION

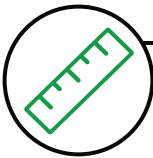

Refer to specific product data sheets for information regarding substrate preparation, coverage rates, working times, mixing and catalyst quantities, and application temperatures.

STORAGE

Always store in cool and dry location. Store upright to avoid deforming rolls and creasing fabric. Fleece shelf life is indefinite with proper storage.

DISPOSAL

WestWood Fleece may be disposed of in standard landfills.

COVERAGE RATES

Widths (all rolls are 164' [50m] in length)	Gross coverage	Net coverage
